

SuitePOS for NetSuite

The fusion of Fast Land-based Performance and Cloud based integration

SuitePOS Overview

SuitePOS is a highly versatile, flexible and scalable POS system for NetSuite's U.S. and Global customers. It is an advanced, locally running POS solution that is tightly integrated with NetSuite. SuitePOS has a distinct advantage over cloud-only solutions: It is designed to ring up orders at fast cash-register speeds, independent of your Internet connection.

Based on a non-proprietary, open-source, Java-based program, SuitePOS is designed from the ground up to work in fast-paced environments, making full use of standard hardware peripherals and speedy touch-screen monitors. Rather than re-invent POS within NetSuite, SuitePOS allows NetSuite clients to rely on a proven, independently running POS solution, Choose SuitePOS for the best speed, flexibility, and low-cost expandability, without needing any additional NetSuite user licenses.

Full-featured, Stand-alone, Fast Operation

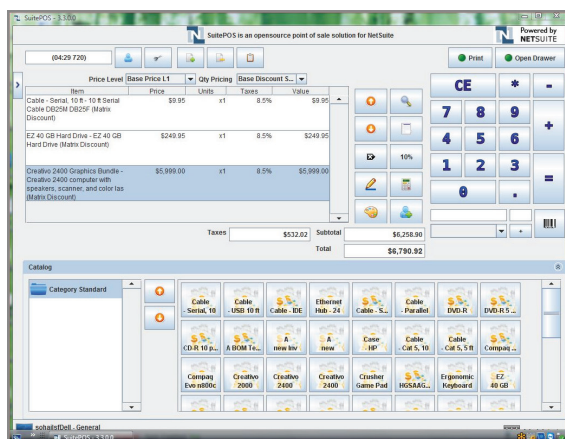

- Run SuitePOS as a stand-alone system, independent of a fast Internet connection.
- Ring up sales fast, using locally-stored NetSuite data, so your customers can check-out with no waiting.

Designed for Touch-screens

- Use touch-screens for fast, easy and accurate order taking.
- You can also use bar-code scanning or item name and number look-up for your NetSuite-based Items.

Tightly integrated with NetSuite

- Make full use of your NetSuite Item records automatically, stored and refreshed in SuitePOS locally.
- Post Transactions to your NetSuite account every few minutes automatically, or whenever an Internet connection is available.
- Take advantage of new Rewards and Loyalty program options in NetSuite

KEY BENEFITS

- > Works across a wide range of environments, on or offline.
- > Uninterrupted operation in case of slow or no Internet.
- > Designed for very fast and efficient operation.
- > Scales easily as your needs grow, within your retail store or with new store locations.
- > Keeps in-store costs low, since there are no additional charges for adding extra registers.
- > Does not require any additional NetSuite licenses.
- > Highly customizable to suit your specific requirements.
- > Retail activity can be monitored by location easily from your NetSuite account.
- > Integration with NetSuite is automatic; SuitePOS runs in the background.
- > SuitePOS is easy to learn and simple to use.

TRY & BUY

- > SuitePOS is available on a 30-day, no-risk trial basis.
- > Trial includes a fully-functional stand-alone POS system.
- > SuitePOS can be installed on a standard Windows or Mac laptop or desktop.
- > Some conditions apply, so please call us for more details.

Key Features

Speedy and Easy

Fast, efficient check-out is the best way to keep your customers coming back. Unlike being at your desk, when you have the luxury of taking an extra two or three minutes to complete an order - when you need to do a speedy check-out - use the fast, locally running SuitePOS system to simplify your life.

No Internet or Slow Internet? No Problem

What happens if the Internet slows to a crawl, or stops altogether during a busy period? With SuitePOS, you can continue to take orders, independent of the Internet.

Orders are stored locally, so whenever you re-connect with NetSuite, SuitePOS automatically posts your batched orders to your NetSuite account. That's peace of mind!

The Flexibility to Meet Your Needs

SuitePOS is written in industry-standard Java. Plus, it's based on an internationally supported open-source program, which means it's very flexible and expandable. So as your needs grow, you're able to add custom features and not be locked into a proprietary system.

Add Registers Easily as You Grow

When your retail business grows, SuitePOS lets you add registers easily: just load another copy of SuitePOS on another terminal, using inexpensive, standards-based POS hardware; point to the master database; and you're done. Cost of SuitePOS client software for additional registers at the location? Zero.

Add Stores Easily as You Grow

Since SuitePOS is NetSuite-driven—even though it can operate off-line—so adding another retail store means you simply create a new location in your NetSuite account. The system can support any number of locations, with a low cost of expansion.

Choose Your Payment Gateway and Processor

SuitePOS supports some of the most popular gateways and processors that integrate with NetSuite, including First Data Global, Authorize.net, Shift4, and VeriSign Paypal PayFlo Pro. Most NetSuite clients already have an account with one of these providers, so getting started is easy.

PRICING

- > Annual managed-subscription fees start at \$7,200.
- > Standard implementation and remotely managed software updates are included free.
- > Seamless upgrades to ensure compatibility with NetSuite.
- > New features and enhancements are made available transparently.
- > Email and telephone technical support is included with subscription.
- > Additional cash-register terminals with SuitePOS client software can be added at no additional cost (does not include standard hardware).

DEPLOYMENT

- > SuitePOS is easy to install and monitor, remotely.
- > Online training is included in the cost of the subscription.
- > Trial subscriptions are available.

“ Since switching over to SuitePOS, we have minimized customer frustration and lengthy checkouts. This streamlined POS system for NetSuite allows us to efficiently and effectively run our store whether we have a few customers or a few hundred customers. ”
